

# HSU STEM Range Days

HSU STEM Range days are monthly opportunities for participants to learn about environmental science skills with hands-on experiences covering a different scientific theme each month. These experiences will focus on the study of environmental science interwoven with all the other fields of science for third through fifth grade participants.

Upcoming session topics include:

- Chemical and Physical Changes
- Weather and Erosion

Register for this opportunity here:  
<https://hsustemrange.eventbrite.com>
