

## Florida Power and Light

Join HSU Educational Foundation FieldWerx on Saturday, March 5th, for an exciting HSU Game Changers STEM family event, which will feature the team from Florida Power and Light held at the HSU UAS Center of Excellence in Crestview.

The Florida Power & Light Company has a long history of working to provide reliable, affordable, and environmentally responsible electricity to customers. They are the largest energy company in the U.S. as measured by retail electricity produced and sold. The company serves more than 5.6 million customer accounts supporting more than 11 million residents across Florida.

Families will be exposed to the skills required to become a power lineman, investigate a power truck and be introduced to solar technologies with hands-on experiences. A Drone Team Challenge Competition will be occurring throughout this Game Changers. You are invited to come anytime after 10am to observe the DTC activities and event.

This Game Changers event is open to the whole family; adults must accompany youth participants. Pre-registration is required.
