

LEGO Prime Robotics

This course is for middle and high school with an interest in completing real world challenges. The students will create engineering projects in this exploration of coding and robotics camp! The curriculum is built upon the familiarity of LEGO bricks combined with STEM Concepts and real-life challenges. Students will explore various projects utilizing LEGO Educational kits and creating solutions using a mix of engineering, coding and robotics.

Course dates: March 31, April 7, 14, 21, 28, May 5, 12, 19, 26. We are offering transportation on the HSU Bus to Crestview HS, Davidson MS, and Shoal River MS students at no cost. All other must provide own transportation.
