

## 3D Printing Camp

Join the HSU Educational Foundation for this exciting class where kids ages 13 and up will learn to diagnose and troubleshoot 3D printer failures and issues, go over repair actions and basic tune-up of machines to improve print quality and machine lifespan. This class is perfect for any students who own a printer or are interested in owning a printer.

Students must be ages 13 and up

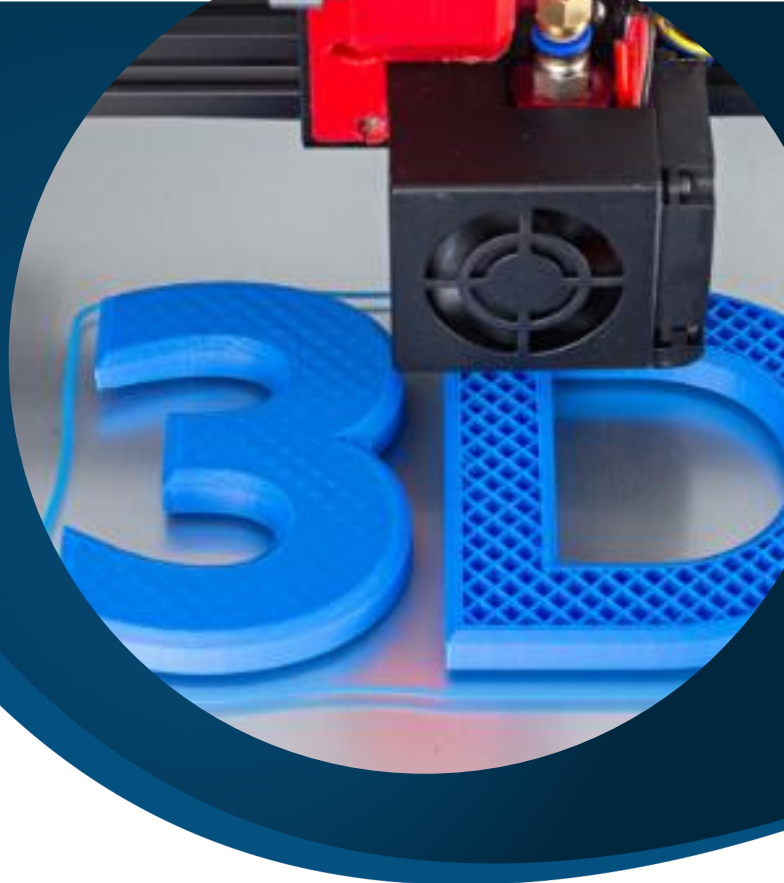

Day 1 will be diagnosing and documenting issues with all machines.

Day 2 will be troubleshooting and determining appropriate repair actions

Day 3 will be repairing and testing 3D printers.

Contact us at [support@hsu-foundation.org](mailto:support@hsu-foundation.org) with any questions!
