## FIELDWERX SUMMIT

**FIELDWERX**  
HSU INNOVATION INSTITUTE

### A FOCUS ON THE FUTURE OF AMERICAN INNOVATION

**On July 4, 2026, America turns 250 — the year – long national celebration leading to this event promises to be nothing short of historic.**

This monumental milestone marks a rare moment to reflect on our journey as a nation — to honor the vision of our founders, recognize the diverse contributions of generations of Americans, and ignite bold ideas for the future we are building together.

**America250** is the official initiative established by Congress to lead this once-in-a-generation celebration. With support from the White House, federal agencies, state and local commissions, national organizations, nonprofits, industries, and academic institutions, **America250 is inviting every American to be part of the story — past, present, and future.**

Between now and July 4, 2026, opportunities are taking place across the country to reflect on who we've been, celebrate who we are, and imagine who we can become.

The Emerald Coast, with our rich threads of both military and civilian interwoven communities, is poised to come together to consider how our unique contributions will align with the future of American innovation.

As part of this bold vision, the **America Innovates** initiative calls on the next generation of creators, thinkers, and problem-solvers: *What innovations will define the next 250 years?*

**Join us for the FieldWerx America250 Summit**—a remarkable gathering of visionary leaders, academic pioneers, and groundbreaking innovators. Together, we'll explore the transformative technologies and bold ideas shaping our collective future. From artificial intelligence to aerospace, biotechnology to energy and environment, this summit serves as a launchpad for innovation, collaboration, and inspiration. Be part of the conversation that will help define the next 250 years of American progress.

Together, let's chart a course for a future as bold and extraordinary as the American spirit itself — and reaffirm our place as a nation of enduring greatness.
