

# HSU CyberPatriot Club South

CyberPatriot team members will learn basic concepts and practices of cybersecurity and their application as used to secure computer systems. The Air Force Association’s CyberPatriot competition provides a means of reinforcing and demonstrating this knowledge through a friendly team-based competition.

Each week the HSU CyberPatriot Club North will meet at the HSU Innovation Institute in Fort Walton Beach (CyberPatriot Club will not meet on school holidays). Teams are made up of 6-8 high school and/or middle school students interested in working toward careers in cybersecurity and other STEM disciplines critical to our nation’s future.

All participants must pre-register here:
